

COMPANY PROFILE

Think clearly. Build what comes next.

Consulting. Architecture. Project delivery.

Technology decisions connected to business outcomes.

01 / WHO WE ARE

Built around your business.

Novatta Technologies Pvt Ltd brings consulting, systems architecture and project delivery into one connected engagement. Based in Hyderabad, we support local and international requirements.

Outcomes first. Technology follows.

01

Understand the context

Business goals, people, locations and the systems already in place.

02

Design the connections

Architecture, integration and security considered together.

03

Deliver with clarity

An agreed scope, defined responsibilities and a practical handover.

Start with the challenge. Shape the right solution.

Clarity before commitment.

Make the next technology decision with a clear view of priorities, dependencies and trade-offs.

Technology strategy

Current-state reviews, capability gaps and phased investment roadmaps.

Enterprise architecture

Requirements, design options and implementation-ready scope.

Cloud advisory

Workload placement, migration readiness and operating considerations.

Security & resilience

Access, protection and recovery requirements aligned to business impact.

Business systems

Workflow mapping, ERP requirements and integration planning.

Digital workplace

Identity, endpoints, productivity platforms and user experience.

Practical outputs: a roadmap, design brief and agreed next steps.

Design the whole picture.

Applications, data, infrastructure and security work best when designed as one environment.

From requirements to a deliverable scope

**01****02****03****04**

Map workflows and dependencies.

Compare architecture and integration options.

Define interfaces, ownership and acceptance criteria.

Plan implementation, migration and handover.

A clear design connects the ambition to the implementation.

Connected capabilities.

Shape the environment around your workloads, people and operating priorities.

Cloud & hybrid

Workload planning, connectivity and migration scope.

Enterprise infrastructure

Servers, virtualisation, storage and platform integration.

Networks & workplaces

Switching, wireless coverage and connected endpoints.

Cybersecurity

Network protection, endpoint controls and access requirements.

Continuity & recovery

Backup design, recovery priorities and validation planning.

Physical infrastructure

Racks, power, cooling and supporting site requirements.

The right configuration starts with a clear
understanding of the environment.

From scope to operation.

A practical delivery approach with clear decision points and responsibilities.

01

Discover

Clarify requirements, current systems and readiness.

02

Define

Agree architecture, scope, dependencies and acceptance criteria.

03

Deliver

Coordinate deployment, configuration, migration and integration.

04

Validate

Check the agreed scenarios and document the results.

05

Handover

Provide documentation and define operational responsibilities.

06

Support

Agree maintenance, troubleshooting and improvement priorities.

Service coverage, schedules and commitments are defined in the agreed proposal.

Specification before sourcing.

Hardware, software and licensing support the solution.
Novatta sources to order through suppliers and distributors.

What we clarify

Configuration and compatibility

Quantity, destination and timing

Warranty, licensing and deployment scope

Commercial terms and supplier availability

A clear route to quotation

01

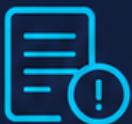

Specify the requirement.

02

Review the proposed configuration.

03

Confirm terms and coordinate delivery.

Important note:

Novatta does not hold stock. Portal prices are budgetary.
Final availability, lead time, GST and commercial terms are confirmed
in a formal quotation.
